

# LEADER LOOP

## LEADER LOOP

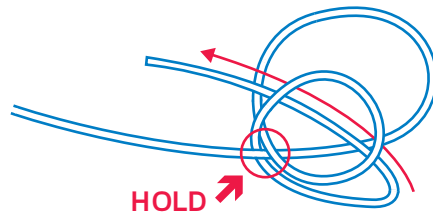

The Leader Loop aka "Perfection Loop" is used to tie a loop in the end your knotless leader to attach to your fly line, via a handshake knot.

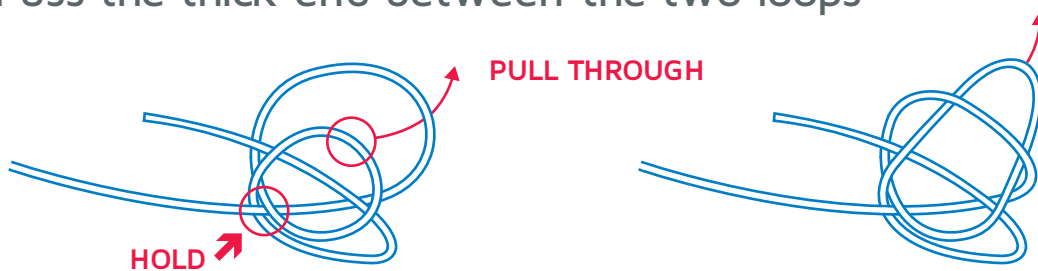

- 1 Make a loop in the thick end of the leader

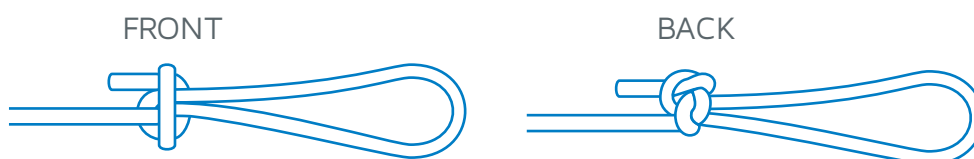

- 2 Make a second loop in front of the first

- 3 Pass the thick end between the two loops

- 4 Pull the second loop through the first loop

- 5 Slowly pull down until tight keeping the knot flat.
