

## ALBRIGHT KNOT

The Albright knot needs a little bit of dexterity, however with a few practices it becomes a reliable knot for tying leader to braided line. Tying leader to braid can be difficult if your leader is too light, 6lb leader will work for most braided lines.

- 1** Make a loop in the braid & feed leader through.

- 2** Wrap around the braid, holding the loop.

- 3** Wrap the leader around the braid at least 12 times & finish on the same side you started.

- 4** Hold both ends of braid & leader, pull tight & trim off both tag ends.
